

Dr. A. C. Shanmugam
Chairman

Er. ACS Arun Kumar
Vice Chairman

Rajarajeswari Dental College & Hospital, Bengaluru

Department of Oral & Maxillofacial Surgery

Cordially invite you to CDE Programme on Distraction Osteogenesis "traction to transformation"

On July 8th 2025, 9 Am onwards
at Smt. Lalitha Lakshmi Auditorium, RRDCH

Guest Lectures

- Orthognathic Surgery versus Distraction Osteogenesis - Dr Andrew Edwards
Dean, Dental, Royal College of Physicians & Surgeons, Glasgow
- Distraction for Maxillomandibular Reconstruction - Dr Pradeep Devdoss
Professor, Meenakshi Ammal Dental College & Hospital, Chennai
- Craniofacial Distraction - Dr. Dipesh Rao, Cleft & Craniofacial Surgeon
Bhagwan Mahaveer Jain Hospital, Bengaluru
- Panel Discussion - Moderator Dr Anjan Shah
Professor, Rajarajeswari Dental College & Hospital, Bengaluru

CDE Program Report

Title: *Distraction Osteogenesis – From Traction to Transformation*

Date:

8th July 2025

Venue:

Smt. Lalitha Lakshmi auditorium, Silver jubilee building, Rajarajeswari dental college & hospital, Bengaluru

Organized by:

Department of Oral and Maxillofacial Surgery, Rajarajeswari dental college & hospital, Bengaluru

Program Overview:

The Continuing Dental Education program titled “*Distraction Osteogenesis – From Traction to Transformation*” aimed to explore the journey of this transformative surgical modality, from its foundational principles to advanced clinical applications in maxillofacial and craniofacial deformities. The session was designed for postgraduate students, interns and faculty to bridge academic knowledge with modern clinical practice.

The auspicious lightening of lamp, along with a invocation song marked the beginning of the event. Following which Dr Mamatha NS, Professor and Head, Department of Oral and Maxillofacial Surgery delivered the welcome speech.

Dr.Edwin Devadoss, Dean, RRDCH, welcomed the dignitaries and encouraged students to actively participate in such academic activities. Dr.Girish HC addressed the gathering and emphasised the importance of innovation in surgical technique. Following which Dr Mamatha NS, Professor and Head, Department of Oral and Maxillofacial Surgery delivered the welcome speech.

RAJARAJESWARI DENTAL COLLEGE AND HOSPITAL
 #14, Ramohalli Cross, Kumbalgodu, Mysore Road, Bengaluru - 560074.

NAAC Accredited | ROYAL COLLEGE OF PHYSICIANS AND SURGEONS GLASGOW | SLMC | ISO | IAO

**DISTRACTION OSTEOGENESIS
 "TRACTION TO TRANSFORMATION"**

Guest Lecturers

Chief Patron
Dr. A.C. Shanmugam
B.A. LL.B. FIVISA (Fests) (Glasgow, UK)
 Founder Chancellor
 Dr. W.G.R. E.S.R. Chennai & RRCH, Bangalore.

Patron
Sri. A.C.S. Arun Kumar
B.Tech (Mech), L.M.S.T., M.B.T., L.M.C.S.,
 M.B.B.S. M.C.S. M.S.T., Chag Falls
 President
 Dr. B.S.R. E.S.R. Chennai & RRCH, Bangalore.

Dr. Andrew Edwards
B.S. F.R.C.S.D. (Mouth), F.R.C.S.D. (ENT), F.R.C.S.D. (Head & Neck)
 Dean, Dental Royal College of Physicians
 & Surgeons, Glasgow (UK)
 Topic: "Orthognathic Surgery Versus
 Distraction Osteogenesis"

Dr. Pradeep Devadoss
M.B.B.S. (M.D.S.)
 Professor, Moenakshi Ammal Dental
 College & Hospital, Chennai
 Topic: "Distraction for Maxillofacial
 Reconstruction"

Dr. Dipesh Rao
M.B.B.S. (M.S.)
 Cleft & Craniofacial Surgeon, Bhagwan
 Mahaveer Jain Hospital, Bengaluru
 Topic: "Craniofacial Distraction"

Dr. Anjan Kumar Shah
M.B.B.S. (M.S.) F.R.C.S.D. (Mouth)
 Professor, Rajarajeswari Dental
 College & Hospital, Bengaluru
 Topic: "Panel Discussion"

Date: 08th July, 2025 (Tuesday) Time: 9:00AM Onwards Venue: Smt. Lalitha Lakshmi Auditorium, RRCH Campus

Programme Objectives:

- To understand the biological and mechanical principles of distraction osteogenesis (DO)
- To discuss the evolution of DO from basic traction principles to transformative craniofacial corrections
- To review current clinical protocols and case-based applications
- To explore recent advances in distractor designs and 3D planning

Scientific Sessions:

Session I: Distraction osteogenesis versus orthognathic surgery

- **Speaker:** Dr. Andrew Edwards

Dean, Dental, Royal college of physicians & surgeons, Glasglow, UK

- He provided an invaluable learning experience. His balanced, evidence-based approach to comparing DO and orthognathic surgery gave attendees a deeper understanding of modern maxillofacial surgical decision-making.

Session II: Distraction Osteogenesis for maxillomandibular reconstruction

- Speaker: Dr Pradeep Devadoss
Professor, Meenakshi Ammal Dental College & Hospital, Chennai

Overview:

- This session focused on the use of distraction osteogenesis in reconstructing severe maxillary and mandibular defects, particularly in: Post-traumatic and post-oncologic defects, Congenital deformities such as hemifacial microsomia and TMJ ankylosis, Segmental reconstruction in edentulous ridges for implant placement
- Dr. Pradeep Devadoss emphasized on Surgical planning and vector control, The use of internal and external distractors, post-operative protocols and complications, Success stories with aesthetic and functional outcomes
- The lecture included detailed case presentations with radiographic and intraoperative visuals, greatly enhancing clinical relevance for the audience.

Session III: Craniofacial Distraction

Speaker: Dr Dipesh Rao

Cleft and Craniofacial Surgeon, Bhagwan Mahaveer Jain Hospital, Bengaluru

Dr. Dipesh Rao delivered an insightful lecture focused on the use of distraction osteogenesis in the cranial and midfacial skeleton, particularly in pediatric and syndromic patients:

- Principles of cranial vault and midface distraction
- Management of syndromes like Crouzon and Apert using Le Fort III and monobloc distractions
- Pediatric considerations: growth modulation and neurocranial expansion
- Use of halo-type external distractors and internal devices
- Neurological, aesthetic, and psychosocial outcomes

His session included high-quality operative visuals, CT scans, and long-term follow-up images, showcasing the transformative potential of craniofacial distraction.

Session IV: Panel Discussion

Moderator: Dr Anjan Kumar Shah

Professor, Department of Oral and Maxillofacial Surgery, Rajarajeswari dental college & hospital, Bangalore.

Panelists:

- **Dr. Andrew Edwards**
- **Dr. Pradeep Devadoss**
- **Dr. Dipesh Rao**
- **Dr. Mamatha NS**

This interactive panel discussion brought together leading experts to address clinical dilemmas and real-world questions submitted by participants. Topics included:

- Decision-making in borderline distraction cases
- Managing DO in syndromic pediatric patients
- Post-operative compliance and physiotherapy
- Long-term stability and psychosocial impact of craniofacial DO
- Device failures and complications

Dr. Anjan Kumar Shah moderated the session skillfully, ensuring active engagement from all the panelists and audience members.

Session 5: Live Demonstration by Dr. Pradeep Devadoss

Live Discussion Highlights:

- **Demonstrated various distraction devices** including intraoral and extraoral distractors and hybrid systems designed by them.
- Explained clinical indications for each type, along with vector planning and fixation techniques
- Discussed the **advantages, limitations, and complication management** for different devices
- Provided tips for device activation, patient compliance, and post-distraction care
- Case-based examples showed how device selection impacts clinical outcomes

This hands-on interaction gave attendees a deep insight into **real-world decision-making in device selection and application**, making the session extremely valuable for both students and practitioners.

Session 6: Live Demonstration by Dr. Dipesh Rao

Dr. Dipesh Rao also **conducted a live demonstration on the application of mandibular distraction devices using anatomical models.**

Demonstration Highlights:

- Step-by-step device placement on a mandibular model
- Vector planning and orientation
- Discussion of common errors and troubleshooting
- Selection criteria for internal vs external distractors
- Tips for post-distraction monitoring and patient compliance

The demonstration significantly enhanced the hands-on understanding of distraction techniques and allowed the audience to visualize theoretical concepts in practice.

We were delighted to have **MR. DANESH, KLS Martin** and **Mr. AKASH, Tusq Instruments LTD UK**, who had graciously agreed to join us and exhibit their advanced instrument sets during the program. Their display included a wide range of high precision tools specially engineered for maxillofacial and craniofacial distraction osteogenesis procedures.

Following the sessions, Vote of thanks delivered by Dr. Shruthi R, Professor, Department of oral and maxillofacial surgery, RRDCH.

A small questionnaire survey was conducted for all the participants regarding “Knowledge, attitude and practice survey on distraction osteogenesis and orthognathic surgery” The program was concluded with lunch.

Participation:

Over 104 attendees including:

- Postgraduate students (OMFS, Orthodontics) of various colleges across Bangalore
- Alumni from department of OMFS
- Practicing oral and maxillofacial surgeons
- Interns and faculty

Feedback Summary:

- An online feedback form was created and circulated among the participants.

- Participants responded positively and expressed appreciation for the session reflecting the success and effectiveness of the program.
- Participants appreciated the case-based learning format.

Conclusion:

The CDE program “*Distraction Osteogenesis – From Traction to Transformation*” proved to be a highly enriching academic event. It offered both foundational knowledge and practical insight into one of the most innovative areas in oral and maxillofacial surgery. The enthusiastic participation and positive feedback reflect the relevance and impact of such advanced training sessions.
